

The New 6220-TSG-DD ISDN Phone is TSG-6 approved.

Tone Commander's new **6220-TSG-DD** On-hook Secure ISDN Telephones are now available in S/T and U interface models and can be used with the 6030X, 30 Button Expansion unit or the 6002TA, Analog Port adapter. The National Telephone Security Working Group (NTSWG) has tested and certified that these telephones are TSG-6 compliant.

- 6220T-TSG-DD, 20 button ISDN phone, S/T interface
TSG Certification Number: TSG-5S0605-2TC
- 6220U-TSG-DD, 20 button ISDN phone, U interface
TSG Certification Number: TSG-5S0605-1TC

A Tone Commander TSG-DD1 Disconnect Device (required for compliance), along with a standalone power supply, is included with these phones.

A 6220-TSG-DD Telephone with the 6002TA Analog Port Terminal Adapter allows STU-III analog phones to connect to your ISDN line with full call control capability, including call origination and answering. Active calls may be switched between the analog port and the ISDN phone.
