MODEL 6220T-TSG
ON-HOOK SECURE ISDN TELEPHONE

TSG-6 Certified,
ISDN Telephone Solution.

TSG-6 Certified On-Hook Secure ISDN Telephone.

Now you can use the advanced technology of ISDN in TSG-6 on-hook secure applications. Tone Commander 6220T-TSG non-encrypted on-hook secure phone sets a new standard for high quality and full-featured performance at an exceptional price.

EASY ACCESS TO ADVANCED ISDN FEATURES.

The 6220T-TSG phone has intuitive user menus, making the phone easy to setup and use. You'll enjoy exceptional sound quality, quick connections, and sophisticated electronic key system features available from ISDN service.

Our products are designed to provide uniform operation over all ISDN switch types, eliminating the need for special user instruction or cross training programs.

WORKS WITH ALL ISDN VERSIONS.

The 6220T-TSG supports all versions of National ISDN and Lucent 5ESS Custom ISDN without firmware or hardware modifications. Compatible with Lucent 5ESS, Nortel DMS-100, Siemens EWSD, and AG Communication Systems GTD-5 networks, Avaya Definity PABX, and Nortel Meridian 1 PABX. User operation is the same on all network platforms.

MEETS TSG-6 CERTIFICATION.

The 6220T-TSG meets the requirements set by the National Telecommunications Security Working Group. All appropriate electronic circuitry has been modified to ensure the 6220T-TSG meets TSG-6 on-hook security measures.

TSG-6 Certification Number: TSG-0212B0103

SIMPLE INSTALLATION.

The 6220T-TSG supports automatic switch detection, Auto-SPID and Parameter Downloading for true Plug & Play operation. This telephone is quick to install because it automatically configures itself to your service. The reversible base and tilt display allow convenient desktop or wall mount installation. A free Windows-based Setup Wizard is available to simplify planning and ordering of your ISDN service and print labels for the phones.

MORE THAN JUST PHONES.

Tone Commander makes a complete family of ISDN and VoIP telephones, attendant consoles, and NT1 network terminations to fit any application, from a single telecommuter to large Centrex installations. In addition, we now offer complete 9-1-1 solutions for PSAP and PBX applications. We have been making products to meet the stringent requirements of telephone companies for over 30 years. Our products are designed and manufactured in the USA.
